The manufacturer claims that this product fulfills the requirements as set by:

EN 62368-1:2014 + AC:2015
EN 55032:2015/A1:2020/A11:2020
EN 61000-3-2:2019/zA1:2021
EN 55035:2017/A11:2020
RoHS & WEEE

Mad Professor handwired pedals have limited lifetime warranty.

SWEET HONEY OVERDRIVE

HANDWIRED

OWNER'S MANUAL

SWEET HONEY OVERDRIVE is a touch sensitive low gain overdrive pedal. It is designed to overdrive distorted amplifiers and give dynamically controlled light overdrive on clean sounds. With our unique Focus control you can adjust the feel and dynamics of the pedal as well as overall EQ. Distortion level is controlled by pick attack and pickup strength.

Pick harder for more overdrive and play softer for cleaner tone. Pick harder for more overdrive and play softer for cleaner tone.

CONTROLS

VOLUME - Sets the overall output level of the pedal.

DRIVE - Controls the amount of overdrive.

FOCUS - Controls how easily the circuit distorts as well as adjusting overall EQ. Turning CCW gives less distortion and a mellow effect, turning CW gives a slight treble boost and earlier distortion.

TECHNICAL SPECIFICATION

- DC eliminator 2.1 mm plug center negative and positive sleeve.
- Protected against wrong DC eliminator polarity.
- Current draw at 9VDC: 5 mA
- Supply voltage range: 7.5-18V
- Input inpedance: 260K Ω
- Output impedance: 25K Ω
- True bypass
