MusicSafe Pro

Unique earplugs for musicians

Must-have for every musician and DJ

As a musician and DJ, you face significant risk of hearing damage as you're often in an environment with loud music. Hearing loss has a direct impact on the performance of your profession or passion because your hearing is the most essential gear. Good hearing is essential and properly protecting your hearing is important during rehearsals, performances and concerts. Our luxury model MusicSafe Pro has been specifically developed for performers.

Revolutionary music earplugs

Twenty years of experience have allowed Alpine to develop ideal universal music earplugs. The extremely well thought-out and extensively tested shape of the earplugs, provides a natural flat absorption and a great fit.

AlpineAcousticFilters™ - Choose your own absorption level

MusicSafe Pro hearing protection are the only universal earplugs in the world with three different filter sets (Low, Medium and High) that you can switch at your own discretion. The three filter sets offer the proper absorption for various circumstances and noise levels. These unique AlpineAcousticFilters™ only absorb the harmful noise. At the same time, the music quality remains unchanged and it is still possible to have a normal conversation with fellow musicians. It is simply like turning down the volume. It is what makes these earplugs the ultimate hearing protection for professional musicians, sound technicians and DJ's.

Extremely comfortable AlpineThermoShape™ material

MusicSafe Pro hearing protection of the special AlpineThermoShape™ material. This material takes on the shape of the ear, due to which the earplugs fit the hearing canal perfectly and stay at the right place in the ear. This gives them a perfectly comfortable fit. AlpineThermoShape material is hypoallergenic, preventing itch in or around the ear. The earplugs can be worn the entire evening and night, without any problems.

Choose your own color

MusicSafe Pro is available in three editions. With black, white and silver-grey earplugs.

Pimp your box

Alpine developed an entirely new storage system for the MusicSafe Pro earplugs. A convenient, compact storage box with space for no less than three filter sets, a set of earplugs and a spare earplug. All in one. And you can customize the storage box to your own style. Pimp your box, put your own name on it or that of the band or a nice picture.

Packaging contents

Three universal thermoplastic hearing protectors
Three pair acoustic filters
Convenient storage box
Alpine carrying strap
Alpine insertion sleeve

4. Protection effective, Angenommene Schutzwirkung, Verwachte dempingswaarde, Valor de atenuación previsto.

Alpine carrying strap

Each MusicSafe Pro comes with an Alpine carrying strap, allowing you to carry the earplugs around your neck when you decide to take them out of your ears for a moment. You can easily clip the convenient strap onto the stem of the earplugs. Use of the carrying strap does not affect the effect of the filter, the absorption remains unchanged.

- Dutch Design
- Reusable

Dutch Design

The design of the Alpine hearing protectors is an exclusive Dutch Design. All earplugs and filter systems are produced in the Netherlands.

Alpine Hearing Protection - Consistently innovative

Alpine Nederland B.V. was founded in 1995 and is one of few manufacturers in the world with hearing protection as its core business. We are continuously working on improving our products, in collaboration with end users. Alpine earplugs are sold across the globe in over 40 countries. All Alpine products have been officially tested by independent inspection bodies, and have the CE certification.
